

EYE HOME SOLUTIONS CERTIFICATION

EYE HOME SOLUTIONS
WATER FILTRATION SYSTEMS

Water Quality Association Approved

The Water Quality Association (WQA) is a non-profit trade organization dedicated to improving water quality and its impact on human health and the environment. They educate, provide resources, and support members involved in water treatment. The WQA collaborates with industry professionals, government agencies, and other organizations to develop and implement water quality standards. They offer certifications, organize conferences, and conduct research to advance water treatment practices. The WQA advocates for safe and clean water and ensures access to clean, sustainable water resources.

MEMBER

Canadian Water Quality Association Approved

The Canadian Water Quality Association (CWQA) is a non-profit organization dedicated to promoting and improving water quality in Canada. They represent manufacturers, suppliers, and dealers in the water treatment industry. The CWQA educates the public, provides resources, and collaborates with government bodies and industry professionals to establish and uphold water quality standards. Through certifications, events, and advocacy, they ensure Canadians have access to safe, clean water.

National Sanitation Foundation

NSF certification is an independent verification process conducted by NSF International to ensure that a product or system meets specific standards and requirements. It signifies that the certified product has undergone rigorous testing for performance, safety, and quality, providing consumers with confidence in its reliability and adherence to industry standards. The NSF certification mark serves as an assurance of quality and is widely recognized in various industries, including water treatment and filtration.
